## The Winter Count

By Dilys Leman

McGill-Queen's University Press. Paperback. Book Condition: new. BRAND NEW, The Winter Count, Dilys Leman, Defenders of the "business-as-usual" approach reject climate action as too costly and in conflict with economic growth, while downplaying the severity of climate change. Supporters of ecological modernization, or "green growth," on the other hand, aim to use technology and efficiency to delink economic expansion from emissions and find business opportunities through environmental action. While mainstream debate has focused on these two pro-growth models, Hayden pays particular attention to the struggles and limited inroads of a third, more radical perspective: the idea of sufficiency, which challenges the continued growth of production and consumption in the already-affluent global North and asks, how much is enough? Drawing on interviews, participation in climate-related events, and analysis of key documents, Hayden shows the role these paradigms have played in Britain, one of the world's leaders in climate reform, and in Canada, a nation at the bottom of international climate change rankings.
