

The Mathematics of Human Motivation: Applying the Law of Escalating Marginal Sacrifice

By Phil Grant

University Press of America. Paperback. Book Condition: New. Paperback. 220 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. The Mathematics of Human Motivation is a pioneering effort to advance the theory of human motivation. It provides powerful, new direction for students of human behavior. Professor Grant has created a theory development book that involves construction and analysis of a mathematical framework for exploring the intricacies of human motivation and satisfaction. Backed by thirty years of study, it draws on multiple disciplines to synthesize a model that has tremendous capacity for answering numerous previously unanswered questions on human motivation, and for predicting human behavior. The model is particularly useful for deriving scores of practical strategies, which organizations can use to enhance human performance and organizational profitability. The book combines contributions from managerial economics, organizational behavior, psychology, human resources, decision theory, and industrial engineering. This is the only book on the market that provides a comprehensive mathematical paradigm for interpreting human motivation issues. It is invaluable in guiding research and application in a wide array of fields. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Otis Wisoky**

This publication is great. It is full of wisdom and knowledge You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
